

Theravance Biopharma Highlights GlaxoSmithKline and Innoviva's Receipt of Positive Opinion from CHMP in Europe for Trelegy Ellipta (Closed Triple)

September 18, 2017

Theravance Biopharma Entitled to Receive 85% Economic Interest in Closed Triple Royalties Paid by GSK as Part of Agreement with Innoviva

DUBLIN, Ireland, Sept. 18, 2017 /PRNewswire/ -- Theravance Biopharma, Inc. (NASDAQ: TBPH) ("Theravance Biopharma") today highlighted that GlaxoSmithKline plc (GSK) and Innoviva, Inc. (Innoviva) have received a positive opinion from the European Medicines Agency's (EMA) Committee for Medicinal Products for Human Use (CHMP), recommending marketing authorization for the Closed Triple (the triple combination therapy of fluticasone furoate, umeclidinium, and vilanterol in a single ELLIPTA[®] inhaler, with a proposed brand name of Trelegy Ellipta). The Closed Triple is a drug development program for which Theravance Biopharma has an economic interest in future payments that may be made by GSK or one of its affiliates pursuant to its agreements with Innoviva (formerly Theravance, Inc.). Should the Closed Triple be approved and commercialized, Theravance Biopharma is entitled to receive an 85% economic interest in the royalties paid by GSK on worldwide net sales. Those royalties are upward-tiering from 6.5% to 10%. Theravance Biopharma is not responsible for any costs related to the Closed Triple.

In an announcement dated September 15, 2017, GSK and Innoviva stated that the CHMP had issued a positive opinion recommending marketing authorization for the Closed Triple as a maintenance treatment in adult patients with moderate to severe chronic obstructive pulmonary disease (COPD) who are not adequately treated by a combination of an inhaled corticosteroid and a long-acting beta2-agonist. A CHMP positive opinion is one of the final steps before marketing authorization is granted by the European Commission. The announcement from GSK and Innoviva also noted that a final decision by the European Commission is anticipated by around the end of 2017. Additionally, the companies noted that regulatory applications have been submitted and are undergoing assessment in a number of other countries, including the US, Australia and Canada. The Closed Triple is an investigational medicine not yet approved for use as a single inhaler triple therapy anywhere in the world.

The Closed Triple combination therapy represents a unique approach to COPD treatment by seeking to combine the activity of three molecules with different mechanisms of action in a single, simple-to-use delivery device. The combination treatment includes: fluticasone furoate (FF), an inhaled corticosteroid; umeclidinium (UMEC), a long-acting muscarinic antagonist (LAMA); and vilanterol (VI), a long-acting beta₂-adrenergic agonist (LABA). This combination has been formulated to be delivered once-daily in GSK's ELLIPTA[®] dry powder inhaler.

Current trends in the treatment of COPD with combination therapy support Theravance Biopharma's view that there is significant market potential for a first-in-class, once-daily triple therapy in a single inhaler. According to GSK, approximately one-third of COPD patients are already utilizing open triple therapy and the progressive nature of the disease indicates that COPD patients will need access to more effective therapies over time. Additionally, results from the Salford Lung Study, a Phase 3 real-world effectiveness trial of two of the components of Closed Triple (FF and VI) in COPD, were strongly supportive of the benefits of once-daily therapy.

The ongoing clinical development program for the Closed Triple in COPD includes the IMPACT study, a large Phase 3 trial designed to evaluate the efficacy and safety of the triple combination treatment compared to dual COPD therapies (FF/VI and UMEC/VI). Results of the IMPACT study are expected to be reported by GSK in 2017. The Closed Triple is also in development for the treatment of symptomatic asthma, and the completion of the Phase 3 CAPTAIN study in asthma is planned for 2018 according to GSK.¹

About Theravance Biopharma

Theravance Biopharma, Inc. is a diversified biopharmaceutical company with the core purpose of creating medicines that help improve the lives of patients suffering from serious illness.

Our pipeline of internally discovered product candidates includes potential best-in-class medicines to address the unmet needs of patients being treated for serious conditions primarily in the acute care setting. VIBATIV[®] (telavancin), our first commercial product, is a once-daily dual-mechanism antibiotic approved in the U.S., Europe and certain other countries for certain difficult-to-treat infections. Revedfenacin (TD-4208) is a long-acting muscarinic antagonist ("LAMA") being developed as a potential once-daily, nebulized treatment for chronic obstructive pulmonary disease ("COPD"). Our neprilysin ("NEP") inhibitor program is designed to develop selective NEP inhibitors for the treatment of a range of major cardiovascular and renal diseases, including acute and chronic heart failure, hypertension and chronic kidney diseases such as diabetic nephropathy. Our research efforts are focused in the areas of inflammation and immunology, with the goal of designing medicines that provide targeted drug delivery to tissues in the lung and gastrointestinal tract in order to maximize patient benefit and minimize risk. The first program to emerge from this research is designed to develop intestinally restricted pan-Janus kinase ("JAK") inhibitors for the treatment of a range of inflammatory intestinal diseases.

In addition, we have an economic interest in future payments that may be made by Glaxo Group Limited or one of its affiliates (GSK) pursuant to its agreements with Innoviva, Inc. relating to certain drug development programs, including the Closed Triple (the combination of fluticasone furoate, umeclidinium, and vilanterol in a single ELLIPTA[®] inhaler, with a proposed brand name of Trelegy Ellipta), currently in development for the treatment of COPD and asthma.

This press release contains certain "forward-looking" statements as that term is defined in the Private Securities Litigation Reform Act of 1995 regarding, among other things, statements relating to goals, plans, objectives, expectations and future events. Theravance Biopharma intends such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in Section 21E of the Securities Exchange Act of 1934 and the Private Securities Litigation Reform Act of 1995. Examples of such statements include statements relating to: the Company's strategies, plans and objectives, the Company's regulatory strategies and timing and results of clinical studies, the potential benefits and mechanisms of action of the Company's product and product candidates and the Company's expectations for product candidates through development, potential regulatory approval and commercialization. These statements are based on the current estimates and assumptions of the management of Theravance Biopharma as of the date of the press release and are subject to risks, uncertainties, changes in circumstances, assumptions and other factors that may cause the actual results of Theravance Biopharma to be materially different from those reflected in the forward-looking statements. Important factors that could cause actual results to differ materially from those indicated by such forward-looking statements include, among others, risks related to: delays or difficulties in commencing or completing clinical studies, the potential that results from clinical or non-clinical studies indicate the Company's product candidates are unsafe or ineffective, the feasibility of undertaking future clinical trials for our product candidates based on FDA policies and feedback, dependence on third parties to conduct clinical studies, delays or failure to achieve and maintain regulatory approvals for product candidates, risks of collaborating with or relying on third parties to discover, develop and commercialize products, risks associated with establishing and maintaining sales, marketing and distribution capabilities with appropriate technical expertise and supporting infrastructure. Other risks affecting Theravance Biopharma are described under the heading "Risk Factors" contained in Theravance Biopharma's Quarterly Report on Form 10-Q filed with the Securities and Exchange Commission (SEC) on August 9, 2017. In addition to the risks described above and in Theravance Biopharma's other filings with the SEC, other unknown or unpredictable factors also could affect Theravance Biopharma's results. No forward-looking statements can be guaranteed and actual results may differ materially from such statements. Given these uncertainties, you should not place undue reliance on these forward-looking statements. Theravance Biopharma assumes no obligation to update its forward-looking statements on account of new information, future events or otherwise, except as required by law.
